Ólafur Arnalds: Erosion

Menu

prev

Ólafur Arnalds

Ólafur Arnalds has a Ph.D. in Soil Science from Texas A&M University. He has been a professor at the Agricultural University of Iceland since 2005 (Dean until 2012). He has participated in numerous international research and policy programs related to soil and environmental sciences (e.g. EU COST, and Nordic networks). He served three years on the board of the Icelandic Research Fund. Ólafur has emphasized outreach programs and the development of educational

Anotace příspěvku

The image shows a screenshot of a web browser window. The browser's address bar is partially visible, showing the text "ion". The browser's toolbar includes icons for back, forward, search, and other functions. A white hand cursor is pointing at the word "Menu" in the top right corner of the page. To the right of "Menu" is a left-pointing arrow and the text "Anotace a struktura kapitoly". Below this, the main content area has a black background with white text. The text reads: "In terms of human life, land is a non-renewable resource. It is created by physico-chemical and biological processes, by the interaction of soil organisms that both inhabit and create it. It is the habitat and home of microbial relationships, energy and matter transformation, and like the ocean,".
